

## **RETAINING CLIP FOR PERSONAL ARTICLES**

### **ABSTRACT OF THE DISCLOSURE**

A retaining clip for holding a personal article such as a condom has a planar central member with a first end and a second end extending transversely. From the first end, a retaining arm extends outward and proximate to the central member for holding a personal article. To attach the clip, an attaching arm extends outward from the second end and is proximate to the central member for affixing the retaining clip to an article of clothing.
